How Can a Man scratch the Illinois Australian Ballet?

CHICAGO, Oct. 11 .- The Democratic state executive committee is stretching its head down to the problem which has come up to be solved. The Republican committee has not yet reached the puzzle, but will in due time have to wrestle with it. The problem which puzzles the committee is how can a man scratch an Australian ballot. There are offices which require several candidates to fill and here is where the confusion arises. There are for each party on the helicity was explicated for conon the ballots two candidates for on the hands two candades for con-gressmen at large, six for judges of the supreme court, two for circuit court judges and ten for county county com-missioners. Suppose a man desired to vote the straight Democratic ticket except that he wished to cast a bailot for one of the Republican candidates for judge of the superior court. He would place a mark in the circle to the left of the word "Democratic" at the top of the column and then make a cross, as the law provides, at the name of the Republican candidate for index for whom he lican candidate for judge for whom he wished to vote. But how would the clerks and judges of election know which one of the six Demoratic candidates for office he desired to scratch? Here is where is the big law is silent, and that is what is worrying the com-mittee. A joint meeting of the Demo-crat and Republican committees may be necessary to settle the matter.

Yesterday the howling of the dogs inside the cabin and the starved appearance of those outside determined the authorities to make an investigation. The old lady was removed to the hospital.
